

[DRAFT] Data Sheet E – Results of Internal Review Committee

Date of Review/Recommendation: December 6, 2010

Water Body Under Evaluation:

Water Body ID #: 3610
Name: Flinger Branch (Class C)
Length of Segment: 1.7 miles
County (ies): Texas

Use Attainability Analysis (UAA) Study:

UAA ID #: 1261
Submitter: MEC/ERC
Date(s) Conducted: September 24, 2008
Date Received: October 24, 2008
Use Evaluated: Whole Body Contact Recreation (WBCR)

UAA Criteria Evaluated:

- ☐ 1-Natural Pollutant Sources.
- ☒ 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.
- ☐ 3-Non-Remedial, Human Caused Condition.
- ☐ 4-Hydrologic Modifications.
- ☐ 5-Natural Physical Features.
- ☐ 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☐ Yes ☐ No ☒ Unknown
Comments: The UAA survey was conducted in August 2008 and no evidence of WBCR was observed. No interviews were conducted.

Is the evaluated use attainable? ☐ Yes ☒ No
Comments: The stream did not meet the maximum or median depth criteria at any of the sites evaluated. This finding is consistent with the 2005 UAA, which also found the stream to not be meeting the depth criteria. Because the depth criteria were not met and there is no evidence of existing use, the committee recommends that the WBCR use designation be removed.

Committee Recommendation: ☐ Add Use ☐ Retain Use ☒ Remove Use
☐ Modify Use ☐ Inconclusive
